Spectral activity episode of the Be-shell star Pleione in 2013-2018 <i>L. Iliev, J. Kubat, B. Kubatova, L. Dankova</i>	3
Anisotropic cosmological model with a massive scalar field in $f(R,T)$ gravity <i>Y. Aditya</i>	12
A remarkable connection between the Jeans' theory of gravitational instabilities and the Newtonian limit of the General Theory of Relativity <i>Michal Křižek, Attila Mészáros</i>	28
Stability of Planar and Non-Planar Libration Points in the Photo-gravitational ER4BP with Oblate Primaries <i>R. R. Dewangan, A. Chakraborty, M. D. Pandey</i>	36
BV photometric observations of the flickering of the dwarf nova RX And <i>R. K. Zamanov, L. Dankova, M. Moyseev, M. Minev, K. A. Stoyanov, V. D. Ivanov</i>	58
Lightcurve analysis of asteroid 15691 Maslov using NAO Rozhen observations and sparse data <i>E. Vchkova Bebekovska, G. Apostolovska, S. Boeva, B. Petrov, G. Borisov and A. Kostov</i>	65
Kaluza-Klein FRW Tsallis holographic dark energy model in scalar-tensor theory of gravitation <i>K. Dasunaidu, Y. Aditya, V. Sreenivasa Rao</i>	72

Post - superhumps maximum on intranight time scales of  
the AM CVn star CR Boo  
*D. Boneva, G. Latev, S. Boeva, K. Yankova, R. Zamanov* 87

Pre-main sequence stars  
*E. Semkov* 94
