Fast spectral variability of the RS CVn-type hromosphere-active star II Pe <i>B. Zhilyaev, M. Andreev, I. Verlyuk</i>	3
Contributing to the spectral evolution of the nova V1405 Cas <i>Josep Martí, Pedro L. Luque-Escamilla , Cintia S. Peri</i>	13
Could we orbit the expanding universe in finite time? <i>M. Krizek</i>	25
Altitude profile of ion production and ionization effect at the Regener-Pfotzer region during the GLE 71 on 17 May 2012 <i>Alexander Mishev, Peter I. Y. Velinov</i>	36
Chi-square test of the relativistic precession model through the neutron star IGR J17511-3057 <i>Ivan Z. Stefanov</i>	46
Properties of Milky Way globular clusters associated with X-ray sources <i>Svetoslav Botev, Petko Nedialkov, Georgi P. Petrov</i>	59
Polarimetric observations of blazars at Belogradchik Observatory <i>Rumen Bachev</i>	78
Mass accretion rate in the jet-driving symbiotic binary MWC 560 <i>V. D. Marchev, R. K. Zamanov</i>	85

Dynamics of anisotropic Renyi holographic dark energy  
model  
*Y. Aditya*
