Astrophysical Investigations

Volume 6. Sofia . 1991

Bulgarian Academy of Sciences

Contents

Extragalactic astronomy

G. T. Petrov — CCD-spectra of the galaxy Arakelian 144	3
G. R. Ivanov — A catalogue of stellar associations in M33	12
G. Petrov, K. Velichkova — Gas accretion in black holes as an energy source in the nuclei of active extragalactic objects	26
V. A. Mineva, B. J. Kovachev — Rotational moments of galaxies — members of multiple systems of different types	32

Stars

D. P. Kjurkchieva, V. G. Shkodrov, Tz. B. Georgiev — Light curves of binary systems where one of the components is a spotted star	40
L. Iliev, B. Kovachev, N. Tomov — 59 Cygni — photometric behaviour after the active period	47
Y. Bellas, I. Borissova — SCN — a program package for scanning of stellar spectro- grams	55

Proceedings of the International workshop "Galactic structure — astrophysical problems", held at Rogen observatory, Bulgaria, September 29 — October 2, 1986

T. Kipper — Age-dependence of the chemical composition of stars in globular clusters	63
L. V. Mirzoyan — Flare activity and flare star system age	71
O. B. Dluzhnevskaya — Main results in the activities of the Soviet Centre of Astro- nomical Data for 5 years	77
A. N. Gerashchenko, Z. I. Kadla, N. V. Yablokova — On the normal helium abundance in globular cluster stars	81
J. Zverko, J. Žižňovský — Photometry and frequency analysis of CP-stars HR 4330 and HD 192 678	86
H. Domke — On the effect of polarization for scattering in spectral lines	90

БАН
БИБЛИОТЕКА

ДАР

K. -H. R ä d l e r — Influence of differential rotation on the degree of axisymmetry of magnetic fields of stellar objects	92
L. H r i c — Binary peculiar star ω UMa — long-term variations of orbital elements	95

Proceedings of the International workshop "Nonstable stars" held at Rogen observatory, Bulgaria, June 1-6, 1987

D. C h o c h o l, A. S k o p a l — Photoelectric photometry of eclipses of the symbiotic binary EG Andromedae	99
J. K e l e m e n — Some new results on the Pleiades flare stars	103
M. P o p o v a, A. A n t o v, V. P o p o v, Z. K r a i c h e v a — Photometric characteristics of KR Aur as an anti dwarf-nova	108

The units used in this volume convert into SI units as follows:

$\text{erg} = 10^{-6} \text{ J}$	$\text{dyn/cm}^2 = 0,1 \text{ Pa}$
$\text{erg/s} = 10^{-7} \text{ W}$	$\text{g/cm}^3 = 10^3 \text{ kg/m}^3$
$\text{Gs} = 10^{-4} \text{ T}$	$M_0 = 1,99 \cdot 10^{30} \text{ kg}$
$\text{\AA} = 10^{-10} \text{ m}$	$L_0 = 3,83 \cdot 10^{26} \text{ W}$

ISSN 0861-265X

INSTRUCTIONS TO AUTHORS

Astrophysical Investigations publishes papers on theoretical investigations and observations in the field of physics and evolution of stars, extragalactic astronomy, the Sun and the solar system, celestial mechanics and methods of astrophysical investigations.

Papers must be to a maximum of 20 standard type-written pages (30 lines, 60 signs).

Papers are accepted only in English.

Each paper should contain a brief abstract followed by key words and the text.

The pages should be numbered consecutively.

Formulae should be written explicitly and numbered on the left-hand side.

Figures can be drawn on photographic paper, tracing paper or typing paper, clean and explicit, numbered on the back side, the top of the figure marked if necessary. The place of the figure in the text should be indicated by arrows in the margin. Figure captions should be typed in sequence on a separate page.

Each table should be typed on a separate page.

References should be provided as for Astronomy and Astrophysics.

The full institutional address of all authors should be typed at the end of the paper.

Manuscripts should be submitted in duplicate. Xeroopies will not be accepted.

Bulgarian authors should provide a text copy in Bulgarian, insertion of formulae is not necessary.

Manuscripts should be addressed to:
