Near infrared spectral lines of neutral oxygen as indicators of activity of the Be stars	3
<i>Lubomir Iliev</i>	
Solar Wind Parameters in Periods of Solar Large-Scale Magnetic Field Reversals	10
<i>Simeon Asenovski</i>	
Star formation under explosion mechanism in a magnetized medium	16
<i>Debasish Mondal, Tanuka Chattopadhyay</i>	
First observations with the 25 cm telescope of the Shumen Astronomical Observatory	30
<i>D. Kjurkchieva, S. Ibryamov, B. Borisov, D. Marchev, V. Popov, D. Dimitrov</i>	
Evolution of the magnetic field reversals in galaxies	39
<i>Evgeny Mikhailov, Tatiana Khasaeva</i>	
On the solar origin of in situ observed energetic protons	51
<i>Rositsa Miteva</i>	
New light curve solution of V568 Peg and first determination of its fundamental parameters	68
<i>D. Kjurkchieva and S. Ibryamov</i>	
Doppler Imaging of the Hertzsprung gap star OU Andromedae	76
<i>Ana Borisova, Uwe Wolter, Renada Konstantinova-Antova and K. P. Schröder</i>	

Theoretical Model of Magnetic Braking in Contact Binary Stars	97
<i>Prabir Gharami, Koushik Ghosh, Farook Rahaman</i>	
Colours of the flickering source of Mira	110
<i>R. Zamanov, S. Boeva, B. Spassov, G. Latev, U. Wolter, K. A. Stoyanov</i>
